About FocalPlane

FocalPlane is your microscopy community site, designed to bring together the global imaging community. The site, which is hosted by Journal of Cell Science, features news, interviews, blog series, tools, job listings, events and the FocalPlane features... webinar series. The platform also hosts two databases - our MicroList database for searching for microscopy resources and our FocalPlane Network for looking for new collaborators, speakers or reviewers.

The community site is free to access and users can register for a free account to post their own contributions. FocalPlane is run by a dedicated Community Manager, who is supported by a distinguished Scientific Advisory Board.
